

CONTENTS OF VOLUME 30

- ALLAN, A. B.—See King, R. O.
- ALLEN, N. L. and PICKUP, E.—The use of a simple barograph in cosmic ray balloon flights, 317.
- ANDERSON, J. A.—See Hlynka, I.
- BALDWIN, H. W.—See Spinks, J. W. T.
- BARTLET, J. C., COUTU, C., LIST, E., and WOOD, M.—The composition of edible bone meal, 137.
- BEAUBIEN, P. E.—See Caplan, D.
- BELANGER, J. Y.—See Pennie, A. M.
- BELLAMY, W. D.—See Katznelson, H.
- BENSON, B., KRUGER, J., DONOVAN, R., and LAROSE, P.—The effect of temperature on the sorption of Orange II by wool, 105.
- BLAKLEY, E. R., SUMNER, A. K., and SPENCER, E. Y.—Synthesis of polypeptides and their enzymatic hydrolysis compared with gluten, 258.
- BLEAKNEY, H. H.—The ductility of metals in creep-rupture tests, 340.
- BOWEN, V. E.—See King, R. O.
- CAMERON, E. L.—See Shelstad, K. A.
- CAPLAN, D. and BEAUBIEN, P. E.—The metallographic preparation of porous and friable coatings, 211.
- CARROLL, M. and MASON, S. G.—The measurement of fiber swelling by the liquid permeability method, 321.
- CAULE, E. J.—A novel high vacuum furnace, 68.
- CLEMENT, M. T.—Citric acid fermentation of beet molasses by *Aspergillus niger* in submerged culture, 82.
- COUTU, C.—See Bartlet, J. C.
- CUDMORE, W. J. G.—See Graham, W.
- DONOVAN, R.—See Benson, B.; Kruger, J.
- DURAND, E. J.—See King, R. O.
- ENGLISH, W. D.—The preparation of anhydrous aluminum chloride, 178.
- FAVIS, D. V., ROBERTSON, A. A., and MASON, S. G.—The heterogeneity of paper. I. Statistics of fluctuations in optical transmission, 280. II. Measurement and significance of optical heterogeneity, 294.
- GRACE, N. H.—See Lips, H. J.
- GRAHAM, W., CUDMORE, W. J. G., and HEYDING, R. D.—Oxidation of petroleum residues, 143.
- GRANT, G. A.—See Katz, M.; McEwen, K. L.; Rose, D.
- HANSEN, E. J. T.—See King, R. O.
- HAY, R. H.—See Pearson, E. C.
- HEYDING, R. D.—See Graham, W.
- HLYNKA, I. and ANDERSON, J. A.—Relaxation of tension in stretched dough, 198.
- HOOPER, F. C.—An experimental residential heat pump, 180.
- HUFF, H. J.—See Pearson, E. C.
- JAMIESON, C. A.—See Katznelson, H.
- KATZ, M., RIBERDY, R., and GRANT, G. A.—The oxidation of carbon monoxide by solid silver permanganate reagents. V. Determination of low concentrations of carbon monoxide by use of thermistors in a thermal cell, 303.
- KATZNELSON, H., JAMIESON, C. A., LAWTON, E. J., and BELLAMY, W. D.—Studies on the treatment of contaminated combs and honey with high velocity electrons, 95.
- KING, R. O. and ALLAN, A. B.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XX. The adverse effect on thermal efficiency of the endothermic reaction required for nuclear ignition as shown by engine experiments with methanol, acetaldehyde, and diethyl ether, 44.
- KING, R. O., DURAND, E. J., ALLAN, A. B., and HANSEN, E. J. T.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XIX. Optimum timing of compression or spark ignition as determined by adjustment of compression ratio; acetaldehyde and diethyl ether as engine fuels, 29.
- KING, R. O., DURAND, E. J., ALLAN, A. B., HANSEN, E. J. T., and BOWEN, V. E.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XXI. Nuclear ignition as illustrated by the characteristics of compression and spark ignition; pentane, hexane, and heptane as engine fuels, 222.
- KRUGER, J.—See Benson, B.
- KRUGER, J., DONOVAN, R., and LAROSE, P.—Observations on the sorption of Orange II by wool, 215.
- LAROSE, P.—See Benson, B.; Kruger, J.
- LAUGHLAND, D. H.—The estimation of vitamin A in low potency oils, 116.

CONTENTS OF VOLUME 30

- ALLAN, A. B.—See King, R. O.
- ALLEN, N. L. and PICKUP, E.—The use of a simple barograph in cosmic ray balloon flights, 317.
- ANDERSON, J. A.—See Hlynka, I.
- BALDWIN, H. W.—See Spinks, J. W. T.
- BARTLET, J. C., COUTU, C., LIST, E., and WOOD, M.—The composition of edible bone meal, 137.
- BEAUBIEN, P. E.—See Caplan, D.
- BELANGER, J. Y.—See Pennie, A. M.
- BELLAMY, W. D.—See Katznelson, H.
- BENSON, B., KRUGER, J., DONOVAN, R., and LAROSE, P.—The effect of temperature on the sorption of Orange II by wool, 105.
- BLAKLEY, E. R., SUMNER, A. K., and SPENCER, E. Y.—Synthesis of polypeptides and their enzymatic hydrolysis compared with gluten, 258.

- KING, R. O., DURAND, E. J., ALLAN, A. B., and HANSEN, E. J. T.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XIX. Optimum timing of compression or spark ignition as determined by adjustment of compression ratio; acetaldehyde and diethyl ether as engine fuels, 29.
- KING, R. O., DURAND, E. J., ALLAN, A. B., HANSEN, E. J. T., and BOWEN, V. E.—The oxidation, decomposition, ignition, and detonation of fuel vapors and gases. XXI. Nuclear ignition as illustrated by the characteristics of compression and spark ignition; pentane, hexane, and heptane as engine fuels, 222.
- KRUGER, J.—See Benson, B.
- KRUGER, J., DONOVAN, R., and LAROSE, P.—Observations on the sorption of Orange II by wool, 215.
- LAROSE, P.—See Benson, B.; Kruger, J.
- LAUGHLAND, D. H.—The estimation of vitamin A in low potency oils, 116.

- LAWTON, E. J.—See Katznelson, H.
 LENTZ, C. P.—A transient heat flow method of determining thermal conductivity: Application to insulating materials, 153.
 LIPS, H. J.—Sulphur analysis of Canadian erucic acid oils, 61.
 LIPS, H. J., GRACE, N. H., and ZIEGLER, J. A.—Processing procedure and flavor stability in soybean oil, 1.
 LIST, E.—See Bartlet, J. C.
 McEWEN, K. L. and GRANT, G. A.—Determination of free chlorine in water by means of *o*-dianisidine dihydrochloride reagent, 66.
 MASON, S. G.—See Carroll, M.; Favis, D. V.
 MISENER, A. D. and THOMPSON, L. G. D.—The pressure coefficient of resistance of thermistors, 89.
 NELSON, G. A. and THORNTON, H. R.—The lactic streptococci in Edmonton milks and creams, 130.
 PEARCE, J. A., ROSE, D., and TESSIER, H.—Assessment of the Fritz continuous butter-making machine for Canadian use, 167.
 PEARSON, E. C., HUFF, H. J., and HAY, R. H.—A metallographic study of pitting corrosion induced in 2S aluminum alloy by exposure to tap water, 311.
 PENNIE, A. M. and BELANGER, J. Y.—A new method for liquid film thickness measurement, 9.
 PICKUP, E.—See Allen, N. L.
 RIBERDY, R.—See Katz, M.
 ROBERTSON, A. A.—See Favis, D. V.
 ROSE, D.—See Pearce, J. A.
 ROSE, D. and GRANT, G. A.—Estimation of salt content of Wiltshire bacon by electrical resistance measurements, 352.
 ROXBURGH, J. M.—Extraction of polyhydroxy compounds from dilute aqueous solutions by cyclic acetal formation. IV. Recovery of *n*-butyraldehyde, 72.
 SHELSTAD, K. A., VAUGHAN, V. E., and CAMERON, E. L.—Barite-aggregate concrete for gamma-ray shielding, 334.
 SPENCER, E. Y.—See Blakley, E. R.
 SPINKS, J. W. T., BALDWIN, H. W., and THORVALDSON, T.—Tracer studies of diffusion in set Portland cement, 20.
 SUMNER, A. K.—See Blakley, E. R.
 TARR, H. L. A.—Chromatographic separation and microbiological assay of indigenous and added cobalamins in crude animal protein materials, 265.
 TESSIER, H.—See Pearce, J. A.
 THOMPSON, L. G. D.—See Misener, A. D.
 THORNTON, H. R.—See Nelson, G. A.
 THORVALDSON, T.—See Spinks, J. W. T.
 VAUGHAN, V. E.—See Shelstad, K. A.
 WOOD, M.—See Bartlet, J. C.
 ZIEGLER, J. A.—See Lips, H. J.

CORRECTIONS

- Page 24. In Line 3, up. $\beta = \frac{x}{2} \sqrt{Dt}$ should read $\beta = \frac{x}{2\sqrt{Dt}}$.
 Page 25. In Line 2. $\frac{\beta}{x} = \frac{1}{2} \sqrt{Dt}$ should read $\beta/x = \frac{1}{2\sqrt{Dt}}$.
 Page 25. In Line 5. $D = \frac{1}{4} t \left(\frac{x}{\beta} \right)^2$ should read $D = \frac{1}{4t} \left(\frac{x}{\beta} \right)^2$.
